A. SCHOOL-LINKED SERVICES (SLS) DESCRIPTION

1. Funded by the County of Santa Clara (“County”), the Mental Health Services Act (MHSA), and school districts, the School-Linked Services (SLS) Initiative includes service coordination and school-based behavioral health services through programs such as Family Engagement, Prevention and Early Intervention (PEI), SLS Behavioral Health (SLS BH), and other programs funded by the state in schools throughout the County. Through these programs, schools become a place where participants and their families can find a network of support and services.
2. The SLS Initiative aims to:
 - a. Provide culturally competent, coordinated services that meet the participants’ needs with an emphasis on prevention and early intervention;
 - b. Build stronger relationships between parents or caregivers and teachers and schools;
 - c. Foster a positive school climate and culture; and
 - d. Make schools into community hubs, build local services and supports, and use data to facilitate and inform services, track results, and improve interventions.
3. SLS Family Engagement Program
 - a. SLS is a partnership with school districts to comprehensively integrate and streamline coordinated services for participants and families. SLS encompasses service coordination through the SLS Initiative, PEI services, and SLS Behavioral Health (SLS BH) services. Services are conducted through a participatory community approach, through which partnerships between schools, public agencies, and community organizations are developed in the County.
 - b. The SLS Initiative includes the following four (4) SLS Essential Elements:
 - i. Service Coordination;
 - ii. Family Engagement;

 - b. The SLS BH program provides longer-term mental health treatment services, including access to child psychiatry services, if needed. Services are provided primarily in the school setting, although they may be accessed at a clinic, home, and community agencies as necessary and as needed by the participants served. Services are individualized and tailored to the needs of the participants based on age, developmental functioning level, history of trauma, cultural values, family environment, and physical health. The SLS BH Program serves participants who have mental health diagnoses, while the PEI Program serves participants with lower acuity diagnoses, no diagnoses, and/or provides preventative services.
